APS - Homepage - Adaptive Power Systems

Abstract. The primary purpose of the static VAR system (SVS) is usually the rapid control of voltage at weak points in a network. A SVS is a combination of discretely and continuously switched VAR sources that are operating in a coordinated fashion by an automated control system. This includes the static VAR compensator...

Minsait ACS, An Indra company | Minsait ACS

The flywheel provides power during a period between the loss of utility supplied power and either the return of utility power or the start of a back-up power system (i.e., diesel generator). Flywheels typically provide 1-100 seconds of ride-through time, and back-up generators are able to get online within 5-20 seconds [18].
