article. For digital cameras, you're mainly dealing with UV, Polarizing, and Neutral Density filters. There are variations of these camera accessories, such as a graduated ND filter, but these are the key filter that you would want to use.

The Only Lens Filter Guide You'll Ever Need

Most "solid" ND filters are round and screw onto the front of the lens. Larger lenses may have circular drop-in filters. However, some ND filters are rectangular or square-shaped and are inserted into special holders that affix to the front of the lens. The filter ratings for round and rectangular filters are identical.
