Formula T1S Brakes Review (2013) - Bike Advisor

The car had a single-bowl master cylinder with a power brake booster, but when it was converted to front disc brakes, it needed a dual-reservoir master cylinder, and the power brake booster was not useable, so it was swapped to a 1" bore manual brake master cylinder. The brake pedal was rock hard, to the point of not being drivable.

Product support – Formula
In a manual brake system, the pedal ratio will be between 5:1 and 6:1 and a power system will be between 4:1 and 5:1. In the above illustration of the hanging pedal on the left, let's assume the overall length of "X" is 12" and the "Y" measures 3". That puts the pedal ratio at 4:1 which is perfect for a power system.
