Emerging infectious diseases in wildlife

Noninfectious diseases such as HABS, pollen-allergies, and avian botulism represent the extreme position in this gradient in that the dynamics of the "pathogen" (e.g., a harmful alga) are completely divorced from the species experiencing pathology. Thus, declines in "hosts" do not necessarily lead to declines in the pathogen.

(PDF) INFECTIOUS AND NON INFECTIOUS DISEASES AS CAUSE OF ...

Capture myopathy (CM) is a non-infectious disease of wild and domestic animals in which muscle damage results from extreme exertion, struggle, or stress. CM often occurs as a result of chemical immobilization, capture, or transport, but it is not always associated with capture and can be the result of other causes of stress.
